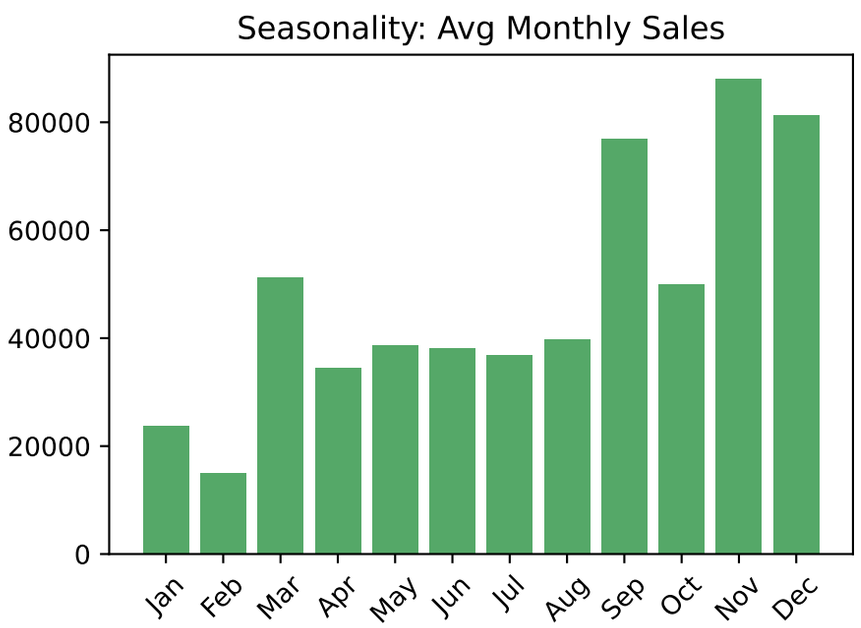
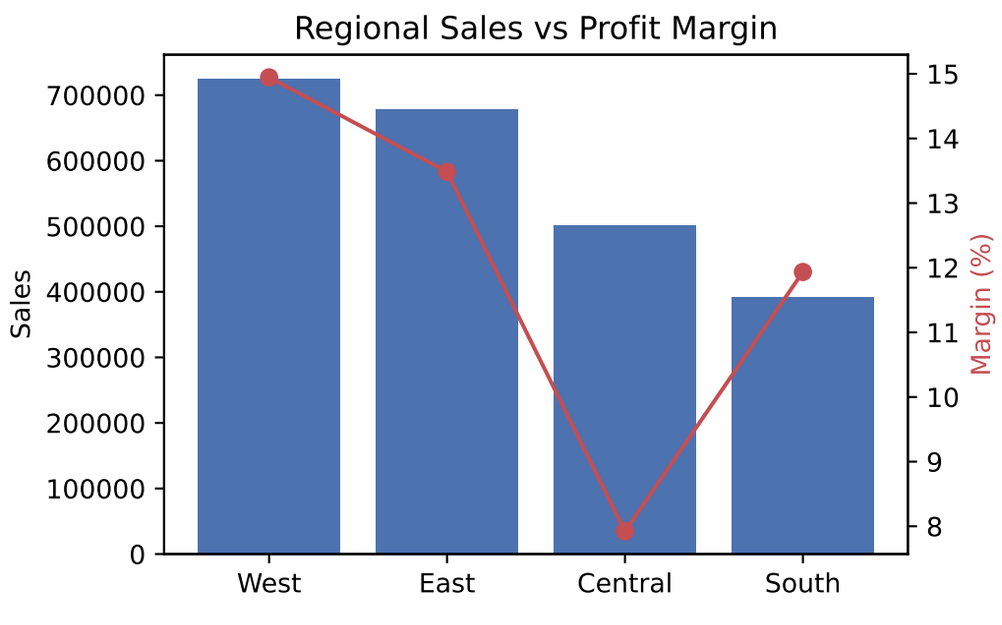
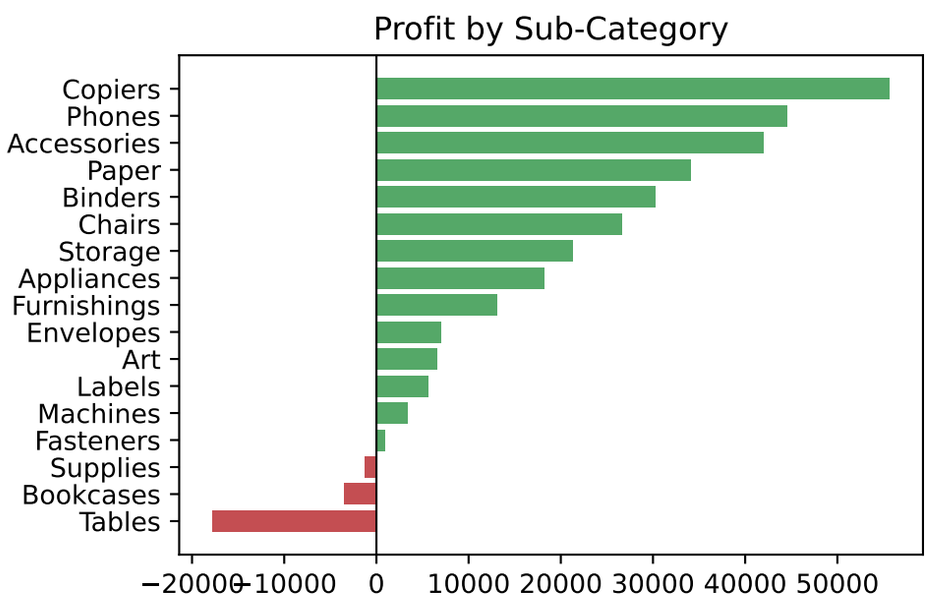
Sales Analysis - Superstore (2014-2017)

Total Revenue: 2,297,201 Total Profit: 286,397 Profit Margin: 12.5%

Total Orders: 5,009 Avg Order Value: 458.61 Top Region: West







KEY INSIGHTS & RECOMMENDATIONS

1. Discounting is destroying profit. Orders with 40%+ discounts lose money on average, and the Central region (lowest margin) averages a 24% discount.
   Recommendation: cap discounts (e.g. 20%) and review Central's discount policy.

2. Tables is the biggest loss-maker, with a profit of -17,725.
   Recommendation: reprice Tables or stop discounting it before dropping the line.

3. Sales peak in Nov and are weakest in Feb.
   Recommendation: build inventory ahead of Q4 and run targeted promotions in Feb.

4. West leads in sales, but sales alone don't show profitability.
   Recommendation: track margin together with revenue when judging regional performance.
